

MOBILEDETECT

Trace Drug Detection

MobileDetect Test Kits

MobileDetect combines certified colorimetric detection technology with automated analysis and reporting on the FREE MobileDetect App for the best, easiest and safest field drug testing available.

With test kits available for every drug, MobileDetect is capable of both trace and bulk sample detection.

The MobileDetect App makes analysis and report generation easy, with features for logging data, photos, GPS mapping and more!

Just a few of the test kits we offer.

DETECTACHEM

Why MobileDetect?

1 Automated Detection

With automated detection through the MobileDetect app, the user does not have to reference color charts and detection is not reliant individual perception or at risk of human error.

3 Logging & Reporting

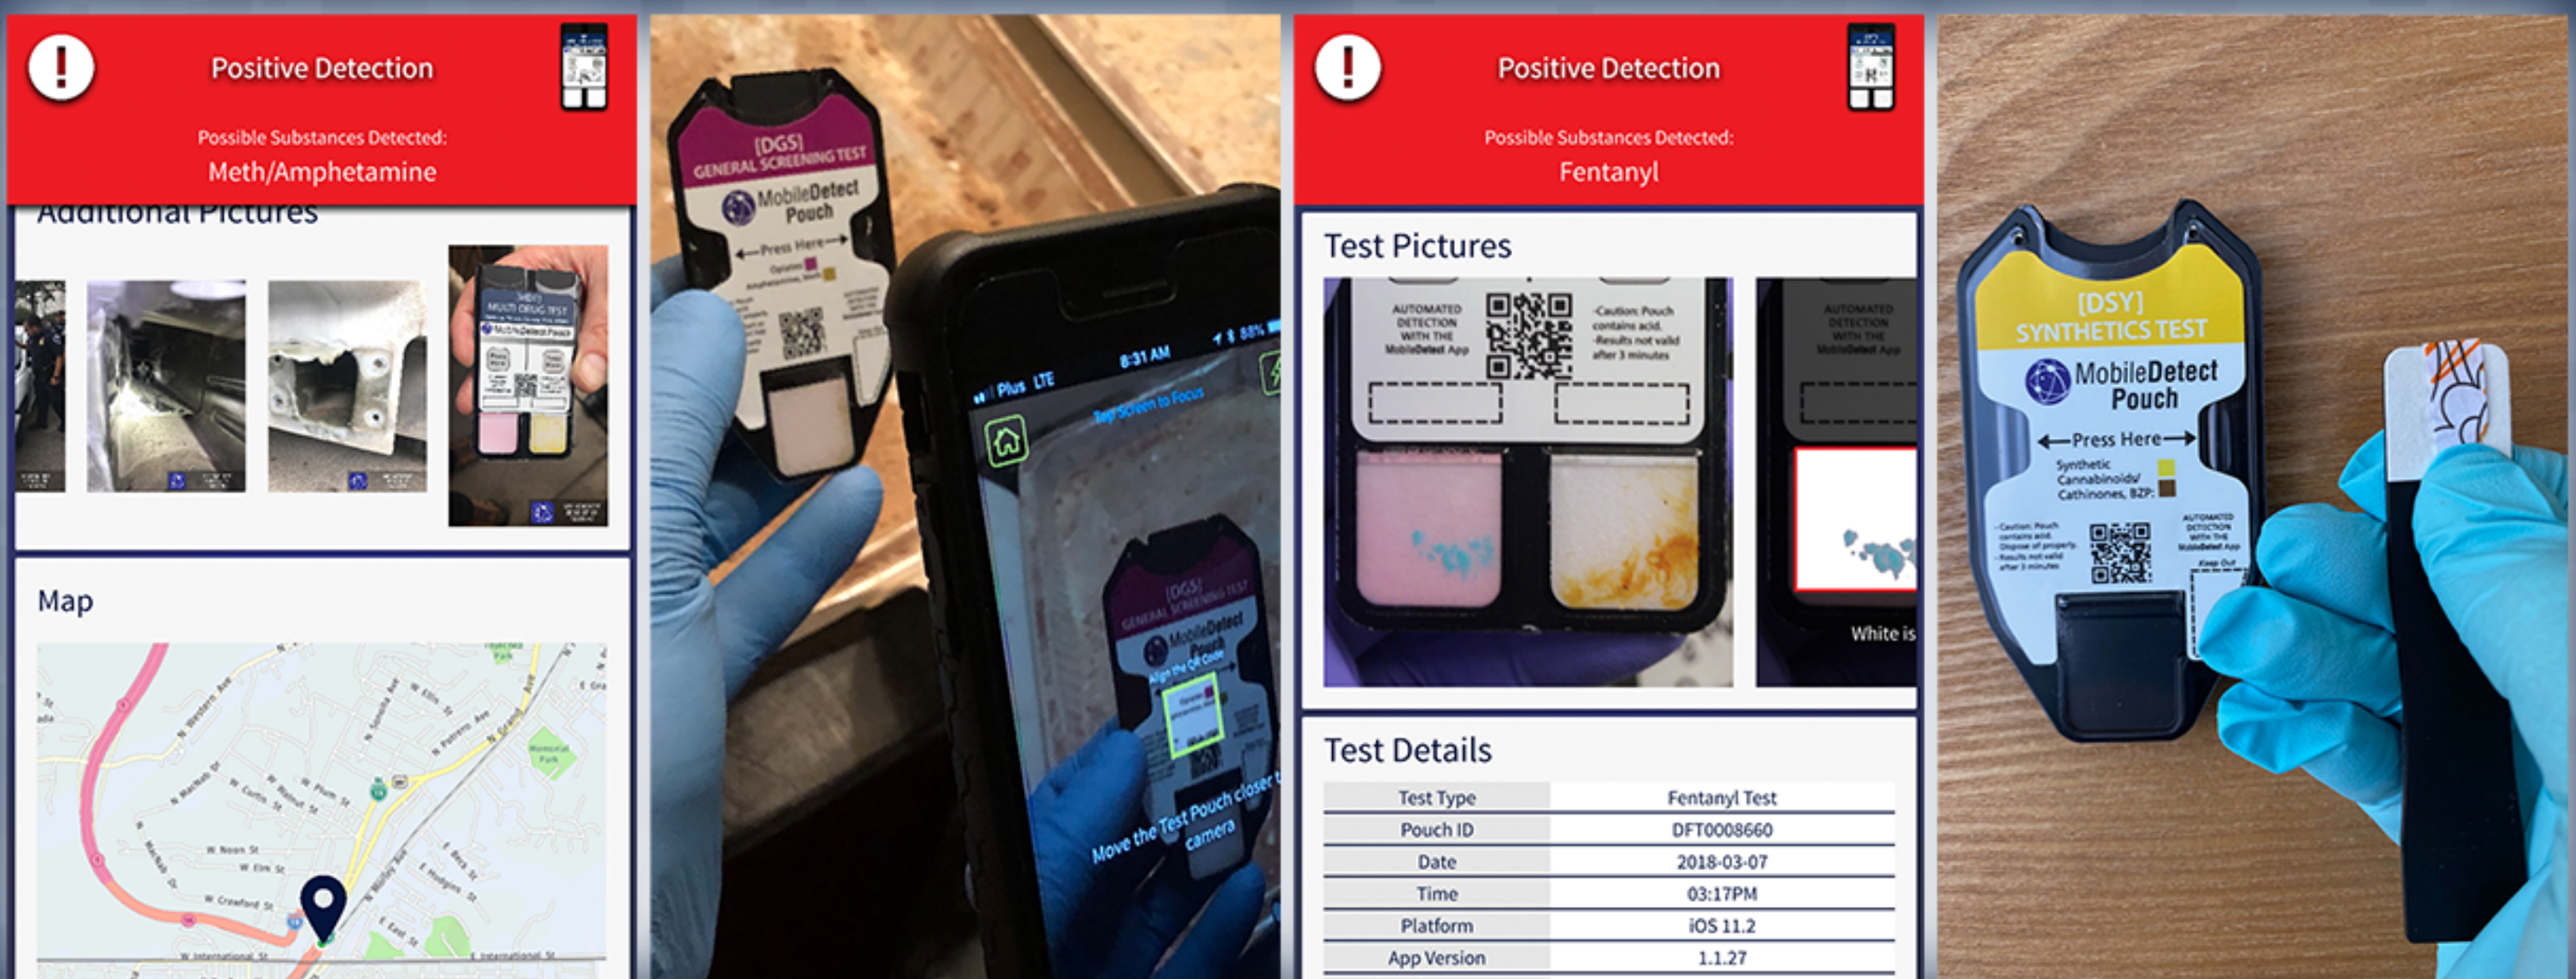

The optional MobileDetect app allows for instant PDF reporting with pictures, GPS mapping, time/date stamps and more. Reports can be sent directly from the your smart device.

2 Trace & Bulk Sampling

Our technology allows for both trace residue and bulk sampling, requiring significantly less sample than older test kits.

4 Our Users

Law enforcement, correctional facilities, military, hazmat, private security, personal testing and more use MobileDetect for drug detection.

Technology	Automated colorimetric.
Sampling	Removable swab for acquiring sample or particulate.
Sample Type	Non-visible (trace) and bulk.
Recommended Devices	Latest Samsung or Apple device with a 12MP camera or better.
App Requirements	Most iOS/Android devices are supported (iOS 13.0 and Android 7.0 or later).
Reporting/Logging	Test info saved on app (notes, pictures, test details, time stamps, GPS location and more). PDF report generation. Sharing via email, text, Dropbox, print, drive, etc.
Substances Detected	Fentanyl analogues, heroin, opiates, methamphetamine, cocaine, synthetic cannabinoids, THC, ketamine, GHB, LSD, PCP, mushrooms, ephedrine, and more.
Updates	All library and interface updates at no cost.
