

The 10[®] 10 Target Screen Kit

Information Sheet

RAZOR[®] System 10 Target Screen Kit

The TEN[®] Target Screen Kit is a leap in capability for the RAZOR system. With the development of BioFire's universal control and unique inhibition control, RAZOR users now have the ability to test for 10 category A and B pathogens in one pouch. In 30 minutes, 10 sensitive and reliable results are available with minimal set up.

One sample, two syringes, ten results.

The 10 pouch tests for the following pathogens:

- Anthrax
- *Brucella melitensis*
- Botulism A
- *Coxiella*
- *E. coli* O157
- Tularemia
- Ricin
- *Salmonella*
- Smallpox
- Plague

CBRN Detection

Quickly assess white powder threats for harmful biological pathogens. The 10 tests for 10 Category A and B BioTerrorism agents.
